TIME MANAGEMENT SYSTEMS

PICONET TIME AND ATTENDANCE SYSTEM

The Piconet Time and Attendance system caters for up to 50 personnel and has been designed to assist companies in **speeding** up Payroll Preparation.

The system comprises of a stand alone terminal (clocking point) which has a robust cast aluminium front together with a mild steel back-board.

Piconet is controlled **simply** and effectively from any office PC or workstation using Piconet Time Management "Windows" based software.

You control the employee shift patterns so clockings and totals can be minute to minute or rounded to 15 minutes with grace time allowed or not, no time calculated before shift start time and with auto-deduction of lunch and paid break options and overtime rules daily or weekly, the Piconet system does it all for you. Holiday – Sickness and absent reporting plus Payroll output file (CSV) can link to "Sage payroll" and others.

Added features include: Remote site application and slave terminal options (2nd. Clocking location)

Main features
